📄 Summary

Senior Software Engineer with 9+ years of experience in frontend and full-stack application development using React, Angular, Java, Spring Boot, REST APIs, and MongoDB. Experienced in leading teams, designing scalable enterprise applications, implementing secure and accessible solutions, optimizing application performance, and delivering end-to-end features within Agile environments. Strong background in version upgrades, authentication, and technical and system design.

🧠 Skills

Core Frontend Expertise	Backend Experience	Tools & Productivity Enhancers
• React Js • Angular 2-21+ • JavaScript • Typescript • HTML,CSS • Tailwind CSS, Angular Material , Bootstrap	• Java 15+ • Spring Boot • MongoDB • Rest API	• VS Code • IntelliJ • AI Agents / Skills • CI/CD • Github CLI / Github Copilot • Chrome Developer Tools

📁 Professional Experience

Persistent Systems Ltd., Indore Senior Engineering Lead	11/2022 – Present
• Led a team of 4 engineers in delivering frontend capabilities for a large-scale Medicaid Management platform supporting healthcare providers across the United States. • Designed scalable technical solutions and collaborated with architects, product owners, and backend teams to translate business requirements into production-ready implementations. • Architected reusable components, shared modules, and application features that improved code maintainability and accelerated feature delivery. • Built Section 508-compliant user interfaces by implementing accessibility standards and best practices across the application. • Contributed to backend development by creating REST APIs using Java, Spring Boot and MongoDB, enabling end-to-end feature delivery across the application stack. • Optimized frontend performance through lazy loading, efficient API integration, and application performance tuning to improve responsiveness. Increased lighthouse report performance factor from 62 to 89. • Leveraged AI-assisted development tools to automate repetitive engineering tasks, accelerate implementation, and improve team productivity. • Strengthened application quality by implementing comprehensive unit tests using Jasmine, Karma, and Jest.	

Accenture, Pune

06/2021 – 11/2022

Software Prod & Plat Eng Sr Analyst

- Developed enterprise web applications using React for digital transformation initiatives supporting global technology clients.(Microsoft , Oracle , Salesforce..)
- Designed reusable UI components and shared frontend modules following modern Angular architecture and coding best practices.
- Participated in Azure DevOps CI/CD pipelines supporting automated application deployment.
- Implemented JWT-based authentication and authorization using React and REST APIs, improving application security through secure token-based user authentication and protected route access.

Tata Consultancy Services, Pune

12/2016 – 06/2021

System Engineer

- Engineered Angular solutions for Morgan Stanley Wealth Management, implementing secure, scalable features to support high-value financial operations.
- Designed reusable UI components, routing strategies, authentication mechanisms, and shared services to improve scalability and maintainability.
- Collaborated with backend teams to develop REST APIs and SQL stored procedures supporting business-critical workflows.
- Participated in technical discussions, production support, and performance optimization initiatives across multiple releases.
- Impact: Improved application performance and reliability for financial clients.

Education

- Bachelor of Engineering (Electronics & Communication Engineering)
Shri Vaishnav Institute of Technology & Science, Indore | RGPV University
2012–2016 | CGPA: 7.54

Achievements

- Received 3 Top Talent Awards at Persistent Systems for consistently delivering high-quality healthcare solutions.
- Recognized as an A-Band Performer at TCS for 3 consecutive years.
- Received multiple client recognitions for technical leadership, engineering excellence, and timely project delivery.
